FUND SUMMARY – LGM Risk Managed Total Return Fund

Investment Objective: The Fund seeks to provide total return from capital appreciation and income with lower volatility than the S&P 500 Index, with a secondary objective of limiting risk during unfavorable or declining market conditions.

Fees and Expenses of the Fund: This table describes the fees and expenses that you may pay if you buy, hold and sell shares of the Fund. **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the tables and examples below.** More information about these fees and expenses is available from your financial intermediary and in **How to Purchase Shares** on page 9 of the Fund’s Prospectus.

Shareholder Fees (fees paid directly from your investment)	Institutional Class
Maximum Sales Charge (Load) Imposed on Purchases (as a percentage of offering price)	None
Maximum Deferred Sales Charge (Load) (as a percentage of offering price)	None
Maximum Sales Charge (Load) Imposed on Reinvested Dividends and other Distributions (as a percentage of offering price)	None
Redemption Fee (as a % of amount redeemed on shares held less than 90 days)	2.00%
Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)	
Management Fees	1.00%
Other Expenses	1.72%
Acquired Fund Fees and Expenses ⁽¹⁾	0.14%
Total Annual Fund Operating Expenses	2.86%

(1) Acquired Fund Fees and Expenses are the indirect costs of investing in other investment companies. The operating expenses in this fee table will not correlate to the expense ratio in the Fund’s financial highlights because the financial statements include only the direct operating expenses incurred by the Fund, not the indirect costs of investment companies.

Example: This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same.

Although your actual costs may be higher or lower, based upon these assumptions your costs would be:

	<u>1 Year</u>	<u>3 Years</u>	<u>5 Years</u>	<u>10 Years</u>
Institutional Class	\$847	\$1,410	\$1,997	\$3,577

Portfolio Turnover: The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. During the fiscal year ended May 31, 2023, the Fund’s portfolio rate was 1,361% of the average value of its portfolio.

Principal Investment Strategies: The Fund is a “fund of funds,” which means it invests primarily in other funds. The Fund seeks to achieve its investment objective by investing in (or allocating to) unaffiliated equity exchange traded funds (“Equity ETFs”) designed to track U.S. equity indices, U.S. money markets, Inverse ETFs and unaffiliated fixed income ETFs (“Bond ETFs”) designed to track major U.S. fixed-income indices and/or benchmark bonds including U.S. investment-grade bonds, U.S. Treasuries, and mortgage-backed securities of all maturities. The adviser’s decision to invest in Equity ETFs, Inverse ETFs, Bond ETFs or money market funds is based on the adviser’s technical research and analysis, including monitoring price movements and price trends of equity markets. The adviser’s strategy of investing in Inverse ETFs, Bond ETFs or money market funds is intended to provide income or protect principal by reducing risks associated with equity markets, and lower volatility during unfavorable or declining market conditions. The adviser may invest all or a portion of the Fund’s assets in Equity ETFs, Inverse ETFs, Bond ETFs or money market funds at any given time, depending on its assessment of market trends and other factors. A market trend is the movement of a financial market in a particular direction over time.

Principal Investment Risks: *As with all mutual funds, there is the risk that you could lose money through your investment in the Fund.*

Credit Risk: Credit risk is the risk that an issuer of a security will fail to pay principal and interest in a timely manner, reducing the Fund's total return. The price of a fixed income security tends to drop if the rating of the underlying issuer drops and the probability of the failure to pay principal and interest increases. Credit risk may be substantial for the Fund.

Equity Risk: Equity securities are susceptible to general stock market fluctuations and to volatile increases and decreases in value. The equity securities held by the Fund may experience sudden, unpredictable drops in value or long periods of decline in value. This may occur because of factors affecting securities markets generally, the equity securities of a particular sector, or a particular company.

Extension Risk: Refers to the risk that if interest rates rise, repayments of principal on certain debt securities may occur at a slower rate than expected and the expected maturity of those securities could lengthen as a result. Securities that are subject to extension risk generally have a greater potential for loss when prevailing interest rates rise, which could cause their values to fall sharply.

Fixed Income Risk: The Fund may invest in fixed income securities, directly or through ETFs. The credit quality rating of securities may be lowered if an issuer's financial condition deteriorates and issuers may default on their interest and or principal payments. Typically, a rise in interest rates causes a decline in the value of fixed income securities.

Fund of Funds Risk: The ETFs and money market funds in which the Fund invests ("Underlying Funds") are subject to investment advisory and other expenses, which are paid indirectly by the Fund. As a result, the cost of investing in the Fund is higher than the cost of investing directly in the Underlying Funds and may be higher than other mutual funds that invest directly in stocks and bonds. Each of the Underlying Funds is subject to its own specific risks. The ability of the Fund to meet its investment objective is directly related to the ability of the ETFs in which it invests and their respective investment managers, to meet their investment objectives.

Interest Rate Risk: Interest rate risk is the risk that bond prices overall, including the prices of securities held by the Fund, will decline over short or even long periods of time due to rising interest rates. Bonds with longer maturities tend to be more sensitive to interest rates than bonds with shorter maturities. For example, if interest rates go up by 1.0%, the price of a 4% coupon bond will decrease by approximately 1.0% for a bond with 1 year to maturity and approximately 4.4% for a bond with 5 years to maturity. An increase in interest rates may result in a decline in the value of the bond investments held by the Fund. As a result, for the present, interest rate risk may be heightened

Management Risk: The adviser's judgments about the attractiveness, value and potential appreciation of a particular security in which the Fund invests or sells may prove to be incorrect and may not produce the desired results.

Market Risk and Geopolitical Risk: The increasing interconnectivity between global economies and financial markets increases the likelihood that events or conditions in one region or financial market may adversely impact issuers in a different country, region or financial market. Securities in the Fund's portfolio may underperform due to inflation (or expectations for inflation), interest rates, global demand for particular products or resources, natural disasters, climate-change and climate related events, pandemics, epidemics, terrorism, international conflicts, regulatory events and governmental or quasi-governmental actions. The occurrence of global events similar to those in recent years may result in market volatility and may have long term effects on both the U.S. and global financial markets.

Overall market risks may also affect the value of the Fund. The net asset value of the Fund will fluctuate based on changes in the value of the underlying stocks comprising the ETFs held by the Fund. Factors such as domestic and international economic growth and market conditions, interest rate levels and political events affect the securities markets and stock prices.

Portfolio Turnover Risk: The Fund's movement into and out of ETFs leads to high portfolio turnover. A higher portfolio turnover will result in higher transactional and brokerage costs.

Performance: The bar chart and performance table below show the variability of the Fund's returns, which is some indication of the risks of investing in the Fund. The bar chart shows performance of the Fund's Institutional Class shares for each full calendar year since the Fund's inception. The performance table compares the performance of the Fund's Institutional Class shares over time to the performance of a broad-based securities market index. You should be aware that the Fund's past performance (before and after taxes) may not be an indication of how the Fund will perform in the future. Updated performance information is available at no cost by calling 1-844-655-9371.

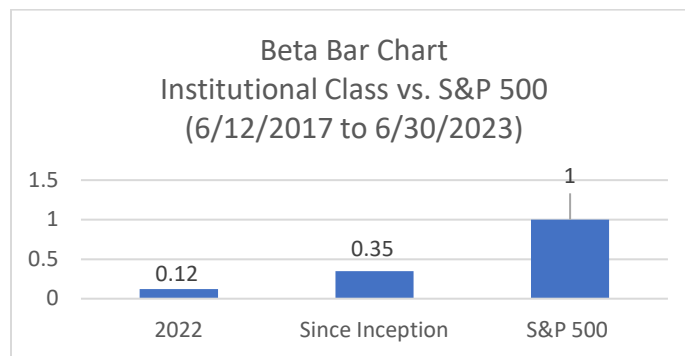

**Performance Bar Chart Institutional Class
Calendar Year Ended December 31**

Best Quarter: 1st Quarter 2019 7.51%
Worst Quarter: 1st Quarter 2020 (10.31)%

The Fund's Institutional Class year-to-date return as of the most recent quarter, which ended June 30, 2023, was 1.29%.

The adviser seeks to produce returns over a complete market cycle with lower volatility, or "beta" than the S&P 500 index. Volatility is a measure of how widely returns vary over a period of time. Beta is a measurement of market risk or volatility. A beta of 1 represents the volatility of the S&P 500, against which other mutual funds and their betas are measured. A beta greater than 1 indicates a mutual funds tends to be more volatile than the S&P 500, and a beta less than 1 means it tends to be less volatile than the S&P 500.

For year ended December 31, 2022 the beta of the Institutional Class was 0.124. Since inception (6/12/17) through June 30, 2023, the beta was 0.35 versus 1.0 for the S&P 500.

**Performance Table
Average Annualized Total Returns
(For periods ended December 31, 2022)**

	One Year	Five Years	Since Inception of the Fund (06-12-17)
Institutional Class Return before taxes	(1.48)%	0.88%	1.81%
Institutional Class Return after taxes on distributions	(1.48)%	(0.33)%	0.59%
Institutional Class Return after taxes on distributions and sale of Fund shares	(0.88)%	0.19%	0.90%
Index – S&P 500 TR	(18.11)%	9.42%	10.55%

Investment Adviser: LGM Capital Management, LLC (the “Adviser”).

Portfolio Manager: Thomas Moring, President of the Adviser, has served the Fund as its portfolio manager since it commenced operations in 2017.

Purchase and Sale of Fund Shares: The minimum initial investment in the Fund is \$5,000 for Institutional Class shares, and the minimum subsequent investment is \$1,000. You may purchase and redeem shares of the Fund on any day that the New York Stock Exchange is open. Redemption requests may be made in writing, by telephone, or through a financial intermediary and will be paid by automated clearing house funds (“ACH”), check or wire transfer. The Fund or the Adviser may waive any of the minimum initial and subsequent investment amounts.

Tax Information: Dividends and capital gain distributions you receive from the Fund, whether you reinvest your distributions in additional Fund shares or receive them in cash, are taxable to you at either ordinary income or capital gains tax rates unless you are investing through a tax-deferred plan such as an IRA or 401(k) plan. However, these dividend and capital gain distributions may be taxable upon their eventual withdrawal from tax-deferred plans.

Payments to Broker-Dealers and Other Financial Intermediaries: If you purchase the Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary’s website for more information.

ADDITIONAL INFORMATION ABOUT PRINCIPAL INVESTMENT STRATEGIES AND RELATED RISKS

INVESTMENT OBJECTIVE: The Fund seeks to provide total return from capital appreciation and income with lower volatility than the S&P 500 Index, with a secondary objective of limiting risk during unfavorable or declining market conditions.

The Fund’s investment objective may be changed without shareholder approval upon 60 days’ written notice to shareholders. The Fund’s investment policies may be changed by the Trust’s Board of Trustees without shareholder approval unless otherwise noted in this Prospectus or the Statement of Additional Information.

PRINCIPAL INVESTMENT STRATEGIES

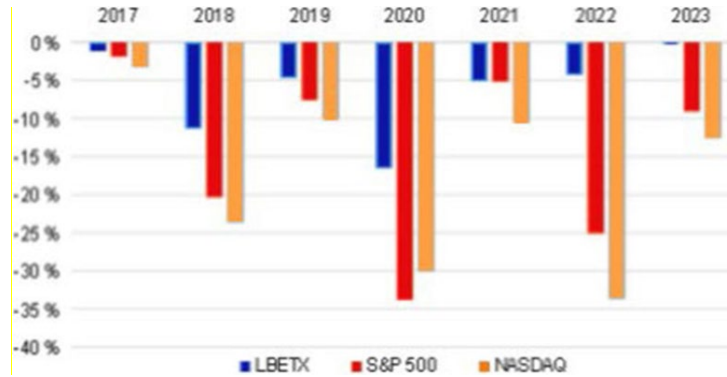

The Fund is a “fund of funds,” which means it invests primarily in other funds. The Fund seeks to achieve its investment objective by investing in (or allocating to) unaffiliated equity exchange traded funds (“Equity ETFs”) designed to track U.S. equity indices, U.S. money markets, Inverse ETFs and unaffiliated fixed income ETFs (“Bond ETFs”) designed to track major U.S. fixed-income indices and/or benchmark bonds including U.S. investment-grade bonds, U.S. Treasuries and mortgage-backed securities of all maturities. The adviser’s decision to invest in Equity ETFs, Inverse ETFs, Bond ETFs or money market funds is based on the adviser’s technical research and analysis, including monitoring price movements and price trends of equity markets. The adviser’s strategy of investing in Inverse ETFs, Bond ETFs or money market funds is intended to provide income or protect principal by reducing risks associated with equity markets, and lower volatility during unfavorable or declining market conditions. The adviser may invest all or a portion of the Fund’s assets in Equity ETFs, Inverse ETFs, Bond ETFs or a money market funds at any given time, depending on its assessment of market trends and other factors. A market trend is the movement of a financial market in a particular direction over time.

By applying its technical research and analysis, the adviser seeks to produce returns over a complete market cycle with lower volatility, or “beta” than the S&P 500 index. Volatility is a measure of how widely returns vary over a period of time. Beta is a measurement of market risk or volatility. A beta of 1 represents the volatility of the S&P 500, against which other mutual funds and their betas are measured. A beta greater than 1 indicates a mutual funds tends to be more volatile than the S&P 500, and a beta less than 1 means it tends to be less volatile than the S&P 500. The adviser’s strategy of investing in Bond ETFs or money market funds is intended to provide income, protect principal by reducing risks associated with the equity markets, and lower volatility during unfavorable or declining market conditions. The adviser may engage in active and frequent trading of the Fund’s portfolio to achieve the Fund’s investment objective.

The Maximum Drawdown of an investment or portfolio is the decline or loss in value measured from the peak to trough (or high to low) over a period of time. It is often illustrated in percentages and considered another way to measure investment or portfolio risk. The larger the percentage of the drawdowns or losses, the more volatility, and often the higher the beta the investment or portfolio is likely to encounter. An important concept associated with Maximum Drawdown is the percentage an investment or portfolio must regain to return to the level where it started. For example, a Maximum Drawdown of 50% requires an investment or portfolio to regain 100% to return to its original value, and a maximum drawdown of 40% requires an investment or portfolio to regain 67% to return to its original value. This concept is especially meaningful for retirement conscious investors, and those nearing or in retirement who may also need to make withdrawals from their portfolio and making the likelihood of a full recovery of their investment even more difficult.

The Time Value of Money is regularly associated with Maximum Drawdown, and often similarly meaningful for retirement conscious investors. The time value of money means that a sum of money is worth more in the present day than the same sum of money in the future, because money can grow only through investing. An investment delayed (due to maximum drawdowns or losses) is an opportunity lost. The time value of money considers the amount of money, its future value, the amount it can earn, and the time frame. This concept is also meaningful for retirement conscious investors, and those nearing or in retirement who may need to make withdrawals from their portfolio.

2017- 2023 Maximum Drawdowns

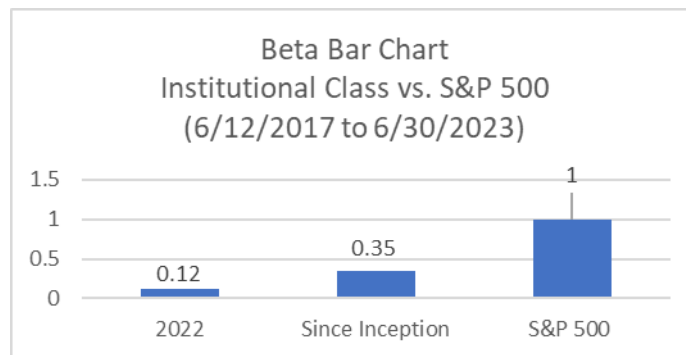

Maximum drawdown is the largest decline from peak to low in value. The bar chart illustrates the success of LBETX in minimizing drawdowns (i.e., sell-offs) vs. the S&P 500, and NASDAQ since inception of the fund. Data as of 9/15/2023

Stock Market Gains Needed to Recover from Percentage Losses

The math of percentages illustrates as losses increase, the recovery needed to get back to breakeven increases at a faster rate. For example, the 2022 S&P 500 price loss of 19.64% requires a 25% recovery to breakeven, and the 2022 NASDAQ price loss of 33.10% requires a 53% recovery to get back to breakeven. For retirement investors, recovery is even more unlikely when including withdrawals needed from their portfolio once retired. For example, a \$1,000 investment that tracked the S&P 500 in year 2000 became \$565.90 by 2009 when adjusted for inflation, a -43.41% loss without factoring withdrawals needed in retirement. That was catastrophic to investors nearing or in retirement.

For year ended June 30, 2023 the beta of the Institutional Class was 0.12. Since inception (6/12/17) through June 30, 2023, the beta was 0.35 versus 1.0 for the S&P 500.

The adviser may allocate the Fund's portfolio to unaffiliated Equity ETFs when the adviser's tactical analysis suggests the market may rise. When the adviser's technical research and analysis suggests the stock market may decline, it may allocate all of the Fund's portfolio to Bond ETFs or money market funds in an effort to provide income, preserve principal, and lower equity volatility and risk exposure.

Generally, the adviser does not attempt to evaluate individual securities. The adviser uses technical analysis, including monitoring price movements and price trends of U.S. securities markets, as evidenced by the S&P 500 Index, in an effort to identify the proper weighting of the Fund's portfolio.

PRINCIPAL INVESTMENT RISKS

The following describes the risks the Fund bears directly or indirectly through investments in Underlying Funds.

Credit Risk: Credit risk is the risk that an issuer of a security will fail to pay principal and interest in a timely manner, reducing the Fund's total return. The price of a fixed income security tends to drop if the rating of the underlying issuer drops and the probability of the failure to pay principal and interest increases. Credit risk may be substantial for the Fund.

Equity Risk: Equity securities are susceptible to general stock market fluctuations and to volatile increases and decreases in value. The equity securities held by the Fund may experience sudden, unpredictable drops in value or long periods of decline in value. This may occur because of factors affecting securities markets generally, the equity securities of a particular sector, or a particular company.

Extension Risk: Refers to the risk that if interest rates rise, repayments of principal on certain debt securities may occur at a slower rate than expected and the expected maturity of those securities could lengthen as a result. Securities that are subject to extension risk generally have a greater potential for loss when prevailing interest rates rise, which could cause their values to fall sharply.

Fixed Income Risk: The Fund may invest in fixed income securities, directly or through ETFs. The credit quality rating of securities may be lowered if an issuer's financial condition deteriorates and issuers may default on their interest and or principal payments. Typically, a rise in interest rates causes a decline in the value of fixed income securities.

Fund of Funds Risk: The ETFs and money market funds in which the Fund invests ("Underlying Funds") are subject to investment advisory and other expenses, which will be indirectly paid by the Fund. As a result, the cost of investing in the Fund will be higher than the cost of investing directly in the Underlying Funds and may be higher than other mutual funds that invest directly in stocks and bonds. Each of the Underlying Funds is subject to its own specific risks. Additional risks of investing in ETFs are described below:

- *ETF Tracking Risk:* Investment in the Fund should be made with the understanding that the passive ETFs in which the Fund invests will not be able to replicate exactly the performance of the indices they track because the total return generated by the securities will be reduced by transaction costs incurred in adjusting the actual balance of the securities. In addition, the passive ETFs in which the Fund invests will incur expenses not incurred by their applicable indices. Certain securities comprising the indices tracked by the passive ETFs may, from time to time, temporarily be unavailable, which may further impede the passive ETFs' ability to track their applicable indices.
- *Management Risk:* When the Fund invests in Underlying Funds there is a risk that the investment advisers of those Underlying Funds may make investment decisions that are detrimental to the performance of the Fund.
- *Net Asset Value and Market Price Risk:* The market value of ETF shares may differ from their net asset value. This difference in price may be due to the fact that the supply and demand in the market for fund shares at any point in time is not always identical to the supply and demand in the market for the underlying basket of securities. Accordingly, there may be times when shares trade at a premium or discount to net asset value.

Interest Rate Risk: Interest rate risk is the risk that bond prices overall, including the prices of securities held by the Fund, will decline over short or even long periods of time due to rising interest rates. Bonds with longer maturities tend to be more sensitive to interest rates than bonds with shorter maturities. For example, if interest rates go up by 1.0%, the price of a 4% coupon bond will decrease by approximately 1.0% for a bond with 1 year to maturity and approximately 4.4% for a bond with 5 years to maturity. An increase in interest rates may result in a decline in the value of the bond investments held by the Fund. As a result, for the present, interest rate risk may be heightened.

Management Risk: The adviser's reliance on its strategy and its judgments about the value and potential appreciation securities in which the Fund invests may prove to be incorrect, including the adviser's tactical allocation of the Fund's portfolio among its investments. The ability of the Fund to meet its investment objective is directly related to the adviser's proprietary investment process. The adviser's assessment of the relative value of securities, their attractiveness and potential appreciation of particular investments in which the Fund invests may prove to be incorrect and there is no guarantee that the adviser's investment strategy will produce the desired results.

Market Risk and Geopolitical Risk: The increasing interconnectivity between global economies and financial markets increases the likelihood that events or conditions in one region or financial market may adversely impact issuers in a different country, region or financial market. Securities in the Fund's portfolio may underperform due to inflation (or expectations for inflation), interest rates, global demand for particular products or resources, natural disasters, climate-change and climate related events, pandemics, epidemics, terrorism, international conflicts, regulatory events and governmental or quasi-governmental actions. The occurrence of global events similar to those in recent years, such as terrorist attacks around the world, natural disasters, social and political discord or debt crises and downgrades, among others, may result in market volatility and may have long term effects on both the U.S. and global financial markets. It is difficult to predict when similar events affecting the U.S. or global financial markets may occur, the effects that such events may have and the duration of those effects. Any such event(s) could have a significant adverse impact on the value and risk profile of the Fund's portfolio. The COVID-19 global pandemic had negative impacts, and in many cases severe negative impacts, on markets worldwide. It is not known how long such impacts, or any future impacts of other significant events described above, will or would last, but there could be a prolonged period of global economic slowdown, which may impact your Fund investment. Therefore, the Fund could lose money over short periods due to short-term market movements and over longer periods during more prolonged market downturns. During a general market downturn, multiple asset classes may be negatively affected. Changes in market conditions and interest rates can have the same impact on all types of securities and instruments. In times of severe market disruptions, you could lose your entire investment.

Portfolio Turnover Risk: The Fund's movement into and out of ETFs leads to high portfolio turnover. A higher portfolio turnover will result in higher transactional and brokerage costs. The Fund's portfolio turnover risk is in accordance with the Fund's investment objective.

TEMPORARY DEFENSIVE POSITIONS: To respond to adverse market, economic, political or other conditions, the Fund may invest 100% of its total assets, without limitation, in high-quality short-term debt securities and money market instruments. These short-term debt securities and money market instruments include: shares of money market mutual funds, commercial paper, certificates of deposit, bankers' acceptances, U.S. government securities and repurchase agreements. While the Fund is in a defensive position, the Fund may not achieve its investment objective. Furthermore, to the extent that the Fund invests in money market mutual funds for cash positions, there will be some duplication of expenses because the Fund pays its pro-rata portion of such money market funds' advisory fees and operational fees.

PORTFOLIO HOLDINGS DISCLOSURE: A description of the Fund's policies and procedures regarding the release of portfolio holdings information is available in the Fund's Statement of Additional Information ("SAI").

OPERATIONAL AND CYBERSECURITY: Fund operations, including business, financial, accounting, data processing systems or other operating systems and facilities may be disrupted, disabled or damaged as a result of a number of factors, including events that are wholly or partially beyond the Fund's control. For example, there could be electrical or telecommunications outages; degradation or loss of internet or web services; natural disasters, such as earthquakes, tornados and hurricanes; disease pandemics; or events arising from local or larger scale political or social events, as well as terrorist acts.

The Fund is also subject to the risk of potential cyber incidents, which may include, but are not limited to, the harming of or unauthorized access to digital systems (for example, through "hacking" or infection by computer viruses or other malicious software code), denial-of-service attacks on websites, and the inadvertent or intentional release of confidential or proprietary information. Cyber incidents may, among other things, harm Fund operations, result in financial losses to the Fund and its shareholders, cause the release of confidential or highly restricted information, and result in regulatory penalties, reputational damage, and/or increased compliance, reimbursement or other compensation costs. Fund operations that may be disrupted or halted due to a cyber incident include trading, the processing of shareholder transactions, and the calculation of the Fund's net asset value.

Issues affecting operating systems and facilities through cyber incidents, any of the scenarios described above, or other factors, may harm the Fund by affecting the adviser, or other service providers, or issuers of securities in which the Fund invests. Although the Fund has business continuity plans and other safeguards in place, including what the Fund believes to be robust information security procedures and controls, there is no guarantee that these measures will prevent cyber incidents or prevent or ameliorate the effects of significant and widespread disruption to our physical infrastructure or operating systems. Furthermore, the Fund cannot directly control the security or other measures taken by unaffiliated service providers or the issuers of securities in which the Fund invests. Such risks at issuers of securities in which the Fund invests could result in material adverse consequences for such issuers, and may cause the Fund's investment in such securities to lose value.

MANAGEMENT

Investment Adviser: LGM Capital Management, LLC, located at 11811 N. Tatum Blvd., Suite 3031, Phoenix, AZ 85028, serves as the Fund's investment adviser (the "Adviser"). The Adviser is registered with the SEC as an investment adviser under the Investment Advisers Act of 1940, as amended. The Adviser is an Arizona limited liability corporation formed in 2016. Its sole client is the Fund. As of May 31, 2023, the Adviser had approximately \$14.3 million in assets under management.

Subject to the oversight of the Board of Trustees, the Adviser is responsible for managing the Fund's investments, placing trade orders and providing related administrative services and facilities under an advisory agreement between the Fund and the Adviser (the "Investment Advisory Agreement").

The management fee set forth in the Investment Advisory Agreement is 1.00%, annually, to be paid on a monthly basis. For the fiscal year ended May 31, 2023, the Adviser earned a fee equal to 1.00% of the Fund's average daily net assets. In addition to investment advisory fees, the Fund pays other expenses including costs incurred in connection with the maintenance of securities law registration, printing and mailing prospectuses and statements of additional information to shareholders, certain financial accounting services, taxes or governmental fees, custodial, transfer and shareholder servicing agent costs, expenses of outside counsel and independent accountants, preparation of shareholder reports and expenses of trustee and shareholders meetings. A discussion regarding the basis for the Board of Trustees' approval of the Investment Advisory Agreement is in the Fund's annual report to shareholders dated May 31, 2023.

Portfolio Manager: Thomas Moring has served as President of LGM Capital Management, the adviser to the Fund since its 2016 inception, and has served the Fund as its portfolio manager since it commenced operations in 2017. Mr. Moring has over 23 years' experience studying stock market technical indicators, and 14 years developing, refining, and validating short-term and intermediate-term pattern and active S&P 500 tactical strategy money management programs. Prior to launching the Fund, Mr. Moring served as legal and compliance oversight for registered investment advisers and advisory firms, and co-founded a fee-based stock market research firm with a focus on the S&P 500 Index, providing services to select registered investment advisors and wealth management firms. Mr. Moring is a practicing attorney and was a founding partner of Pak & Moring PLLC. Mr. Moring's education includes: B.A., Chinese Studies, University of Arizona (1995) and J.D., University of Arizona, the James Rogers College of Law, (2001). He is an active member of the State Bar of Arizona.

The SAI provides additional information about the Portfolio Manager's compensation, other accounts managed and ownership of Fund shares.

HOW SHARES ARE PRICED

Shares of the Fund are sold at NAV. The NAV of the Fund is determined at the close of regular trading (normally 4:00 p.m. Eastern Time) on each day the New York Stock Exchange ("NYSE") is open for business. NAV is computed by determining, on a per class basis, the aggregate market value of all assets of the applicable Fund, less its liabilities, divided by the total number of shares outstanding ((assets-liabilities)/number of shares = NAV). The Exchange is closed on weekends and New Year's Day, Martin Luther King, Jr. Day, Presidents' Day, Good Friday, Memorial Day, Juneteenth, Independence Day, Labor Day, Thanksgiving Day and Christmas Day ("NYSE Close"). The NAV takes into account, on a per class basis, the expenses and fees of the Fund, including management, administration, and distribution fees, which are accrued daily. The determination of NAV for the Fund for a particular day is applicable to all applications for the purchase of shares, as well as all requests for the redemption of shares, received by the Fund (or an authorized broker or agent, or its authorized designee) before the close of trading on the Exchange on that day.

Generally, the Fund's securities, including securities issued by ETFs, are valued each day at the last quoted sales price on each security's primary exchange. Securities traded or dealt in upon one or more securities exchanges (whether domestic or foreign) for which market quotations are readily available and not subject to restrictions against resale shall be valued at the last quoted sales price on the primary exchange or, in the absence of a sale on the primary exchange, at the mean between the current bid and ask prices on such exchange. Securities primarily traded in the National Association of Securities Dealers' Automated Quotation System ("NASDAQ") National Market System for which market quotations are readily available shall be valued using the NASDAQ Official Closing Price. Securities that are not traded on any securities exchange (whether domestic or foreign) and for which over-the-counter market quotations are readily available generally shall be valued at the last sale price or, in the absence of a sale, at the mean between the current bid and ask price on such over-the-counter market. Debt securities not traded on an exchange may be valued at prices supplied by a pricing agent(s) based on broker or dealer supplied valuations or matrix pricing, a method of valuing securities by reference to the value of other securities with similar characteristics, such as rating, interest rate and maturity.

If market quotations are not readily available, securities will be valued at their fair market value as determined using the “fair value” procedures approved by the Board of Trustees. Fair value pricing involves subjective judgments and it is possible that the fair value determined for a security may be materially different than the value that could be realized upon the sale of that security. The fair value prices can differ from market prices when they become available or when a price becomes available. The Board of Trustees may enlist third party consultants such as an audit firm or financial officer of a security issuer on an as-needed basis to assist in determining a security-specific fair value. The Board of Trustees reviews fair value prices at least quarterly to assure the process produces reliable results.

The Fund may use independent pricing services to assist in calculating the value of the Fund’s securities. In addition, market prices for foreign securities are not determined at the same time of day as the NAV for the Fund. Because the Fund may invest in underlying ETFs which hold portfolio securities primarily listed on foreign exchanges, and these exchanges may trade on weekends or other days when the underlying ETFs do not price their shares, the value of some of the Fund’s portfolio securities may change on days when you may not be able to buy or sell Fund shares.

In computing NAV, the Fund values foreign securities held by the Fund at the latest closing price on the exchange in which they are traded immediately prior to closing of the NYSE. Prices of foreign securities quoted in foreign currencies are translated into U.S. dollars at current rates. If events materially affecting the value of a security in the Fund’s portfolio, particularly foreign securities, occur after the close of trading on a foreign market but before the Fund prices its shares, the security will be valued at fair value. For example, if trading in a portfolio security is halted and does not resume before the Fund calculates its NAV, the Adviser may need to price the security using the Fund’s fair value pricing guidelines. Without a fair value price, short-term traders could take advantage of the arbitrage opportunity and dilute the NAV of long-term investors. Fair valuation of the Fund’s portfolio securities can serve to reduce arbitrage opportunities available to short-term traders, but there is no assurance that fair value pricing policies will prevent dilution of the Fund’s NAV by short term traders. The determination of fair value involves subjective judgments. As a result, using fair value to price a security may result in a price materially different from the prices used by other mutual funds to determine net asset value, or from the price that may be realized upon the actual sale of the security.

With respect to any portion of the Fund’s assets that are invested in one or more mutual funds registered under the 1940 Act, the Fund’s net asset value is calculated based upon the net asset values of those mutual funds, and the prospectuses for these companies explain the circumstances under which those companies will use fair value pricing and the effects of using fair value pricing.

HOW TO PURCHASE SHARES

The Fund offers Institutional Class shares. Institutional Class shares may not be available for purchase in all states.

Purchasing Shares: You may purchase shares of the Fund by sending a completed application form (the “Application”) to the following address:

Regular Mail
“LGM Risk Managed Total Return Fund”
c/o Ultimus Fund Solutions, LLC
P.O. Box 541150
Omaha, Nebraska 68154

Express/Overnight Mail
“LGM Risk Managed Total Return Fund”
c/o Ultimus Fund Solutions, LLC
4221 North 203rd Street, Suite 100
Elkhorn, Nebraska 68022

The USA PATRIOT Act requires financial institutions, including the Fund, to adopt certain policies and programs to prevent money-laundering activities, including procedures to verify the identity of customers opening new accounts. As requested on the Application, you should supply your full name, date of birth, social security number and permanent street address. Mailing addresses containing a P.O. Box will not be accepted. This information will assist the Fund in verifying your identity. Until such verification is made, the Fund may temporarily limit additional share purchases. In addition, the Fund may limit additional share purchases or close an account if it is unable to verify a shareholder’s identity. As required by law, the Fund may employ various procedures, such as comparing the information to fraud databases or requesting additional information or documentation from you, to ensure that the information supplied by you is correct.

Purchase through Brokers: You may invest in the Fund through brokers or agents who have entered into selling agreements with the Fund's distributor. The brokers and agents are authorized to receive purchase and redemption orders on behalf of the Fund. The Fund will be deemed to have received a purchase or redemption order when an authorized broker or its designee receives the order. The broker or agent may set their own initial and subsequent investment minimums. You may be charged a fee if you use a broker or agent to buy or redeem shares of the Fund. Finally, various servicing agents use procedures and impose restrictions that may be in addition to, or different from those applicable to investors purchasing shares directly from the Fund. You should carefully read the program materials provided to you by your servicing agent. Such brokers are authorized to designate other intermediaries to receive purchase and redemption orders on the Fund's behalf.

Purchase by Wire: If you wish to wire money to make an investment in the Fund, please call the Fund at 1-844-655-9371 for wiring instructions and to notify the Fund that a wire transfer is coming. Any commercial bank can transfer same-day funds via wire. The Fund will normally accept wired funds for investment on the day received if they are received by the Fund's designated bank before the close of regular trading on the NYSE. Your bank may charge you a fee for wiring same-day funds.

Automated Clearing House (ACH) Purchase: Current shareholders may purchase additional shares via Automated Clearing House ("ACH"). To have this option added to your account, please send a letter to the Fund requesting this option and supply a voided check for the bank account. Only bank accounts held at domestic institutions that are ACH members may be used for these transactions.

You may not use ACH transactions for your initial purchase of Fund shares. ACH purchases will be effective at the closing price per share on the business day after the order is placed. The Fund may alter, modify or terminate this purchase option at any time.

Shares purchased by ACH will not be available for redemption until the transactions have cleared. Shares purchased via ACH transfer may take up to 15 days to clear.

Automatic Investment Plan: You may participate in the Fund's Automatic Investment Plan, an investment plan that automatically moves money from your bank account and invests it in the Fund through the use of electronic funds transfers or automatic bank drafts. You may elect to make subsequent investments by transfers of a minimum of \$100 on specified days of each month into your established Fund account. Please contact the Fund at 1-844-655-9371 for more information about the Fund's Automatic Investment Plan.

An initial investment in the Fund cannot be paid via ACH.

Minimum and Additional Investment Amounts: The minimum initial investment in the Fund is \$5,000, and the minimum subsequent investment is \$1,000. There is no minimum investment requirement when you are buying shares by reinvesting dividends and distributions from the Fund. The Fund reserves the right to waive any investment minimum requirement.

The Fund reserves the right, in its sole discretion, to reject any Application. Applications will not be accepted unless they are accompanied by a check drawn on a U.S. bank, thrift institutions, or credit union in U.S. funds for the full amount of the shares to be purchased. After you open an account, you may purchase additional shares by sending a check together with written instructions stating the name(s) on the account and the account number, to the above address. Make all checks payable to the Fund. The Fund will not accept payment in cash, cashier's checks or money orders. Also, to prevent check fraud, the Fund will not accept third party checks, U.S. Treasury checks, credit card checks or starter checks for the purchase of shares.

Note: Ultimus Fund Solutions, LLC, the Fund's transfer agent, will charge a \$25 fee against a shareholder's account, in addition to any loss sustained by the Fund, for any check or electronic payment returned to the transfer agent for insufficient funds.

When Order is Processed: All shares will be purchased at the NAV per share (plus applicable sales charges, if any) next determined after the Fund receives your application or request in good order. All requests received in good order by the Fund before NYSE Close will be processed on that same day. Requests received after NYSE Close will be processed on the next business day.

Good Order: When making a purchase request, make sure your request is in good order.

"Good order" means your purchase request includes:

- the name of the Fund
- the dollar amount of shares to be purchased
- a completed purchase application or investment stub
- check payable to the "LGM Risk Managed Total Return Fund"

Retirement Plans: You may purchase shares of the Fund for your individual retirement plans. Please call the Fund at 1-844-655-9371 for the most current listing and appropriate disclosure documentation on how to open a retirement account.

HOW TO REDEEM SHARES

Redeeming Shares: The Fund typically expects that it will take up to three business days following the receipt of your redemption request to pay out redemption proceeds by check or electronic transfer. The Fund typically expects to pay redemptions from cash, cash equivalent, proceeds from the sale of Fund shares, any lines of portfolio securities. These redemption payment methods will be used in regular and stressed market conditions. You may redeem all or any portion of the shares credited to your account by submitting a written request for redemption to:

Regular Mail

“LGM Risk Managed Total Return Fund”

P.O. Box 541150
Omaha, Nebraska 68154

Express/Overnight Mail

“LGM Risk Managed Total Return Fund”

4221 North 203rd Street, Suite 100
Elkhorn, Nebraska 68022

Redemptions by Telephone: The telephone redemption privilege is automatically available to all new accounts. If you do not want the telephone redemption privilege, you must indicate this in the appropriate area on your account application or you must write to the Fund and instruct it to remove this privilege from your account. The proceeds, which are equal to number of shares times NAV less any applicable deferred sales charges or redemption fees, will be sent by mail to the address designated on your account or sent electronically, via ACH or wire, directly to your existing account in a bank or brokerage firm in the United States as designated on our application. If you own an IRA, you will be asked whether or not the Fund(s) should withhold federal income tax. To redeem by telephone, call 1-844-655-9371.

The Fund reserves the right to suspend the telephone redemption privileges with respect to your account if the name(s) or the address on the account has been changed within the previous 30 days. Neither the Fund, the transfer agent, nor their respective affiliates will be liable for complying with telephone instructions they reasonably believe to be genuine or for any loss, damage, cost or expenses in acting on such telephone instructions and you will be required to bear the risk of any such loss. The Fund or the transfer agent, or both, will employ reasonable procedures to determine that telephone instructions are genuine. If the Fund and/or the transfer agent do not employ these procedures, they may be liable to you for losses due to unauthorized or fraudulent instructions. These procedures may include, among others, requiring forms of personal identification prior to acting upon telephone instructions, providing written confirmation of the transactions and/or tape recording telephone instructions.

During periods of high market activity, you may encounter higher than usual wait times. Please allow sufficient time to ensure that you will be able to complete your telephone transaction prior to market close. Neither the Fund nor its Transfer Agent will be held liable if you are unable to place your trade due to high call volume.

Redemptions through Broker: If shares of the Fund are held by a broker-dealer, financial institution or other servicing agent, you must contact that servicing agent to redeem shares of the Fund. The servicing agent may charge a fee for this service.

Redemptions by Wire: You may request that your redemption proceeds be wired directly to your bank account. The Fund's transfer agent imposes a \$15 fee for each wire redemption and deducts the fee directly from your account. Your bank may also impose a fee for the incoming wire.

Systematic Withdrawal Plan: If your individual account, IRA or other qualified plan account has a current account value of at least \$50,000, you may participate in the Fund's Systematic Withdrawal Plan, an investment plan that automatically moves money to your bank account from the Fund through the use of electronic funds transfers. You may elect to make subsequent withdrawals by transfers of a minimum of \$500 on specified days of each month into your established bank

Redemptions in Kind: The Fund reserves the right to honor requests for redemption or repurchase orders by making payment in whole or in part in readily marketable securities (“redemption in kind”) if the amount is greater than \$250,000 or 1% of the Fund's assets. The securities will be chosen by the Fund and valued using the Fund's net asset value pricing procedures. A shareholder will be exposed to market risk until these securities are converted to cash and may incur transaction expenses in converting these securities to cash.

When Redemptions are Sent: Once the Fund receives your redemption request in “good order” as described below, it will issue a check based on the next determined NAV following your redemption request. If you purchase shares using a check and soon after request a redemption, your redemption proceeds will not be sent until the check used for your purchase has cleared your bank.

Good Order: Your redemption request will be processed if it is in “good order.” To be in good order, the following conditions must be satisfied:

- The request should be in writing, unless redeeming by telephone, indicating the number of shares or dollar amount to be redeemed;
- The request must identify your account number;
- The request should be signed by you and any other person listed on the account, exactly as the shares are registered; and
- If you request that the redemption proceeds be sent to a person, bank or an address other than that of record or paid to someone other than the record owner(s), or if the address was changed within the last 30 days, or if the proceeds of a requested redemption exceed \$50,000, the signature(s) on the request must be medallion signature guaranteed by an eligible signature guarantor.

When You Need Medallion Signature Guarantees: If you wish to change the bank or brokerage account that you have designated on your account, you may do so at any time by writing to the applicable Fund with your signature guaranteed. A medallion signature guarantee assures that a signature is genuine and protects you from unauthorized account transfers.

You will need your signature guaranteed if:

- you request a redemption to be made payable to a person not on record with the Fund;
- you request that a redemption be mailed to an address other than that on record with the Fund;
- the proceeds of a requested redemption exceed \$50,000;
- any redemption is transmitted by federal wire transfer to a bank other than the bank of record; or
- your address was changed within 30 days of your redemption request.

Signatures may be guaranteed by any eligible guarantor institution (including banks, brokers and dealers, credit unions, national securities exchanges, registered securities associations, clearing agencies and savings associations). Further documentation will be required to change the designated account if shares are held by a corporation, fiduciary or other organization. *A notary public cannot guarantee signatures.*

Retirement Plans: If you own an IRA or other retirement plan, you must indicate on your redemption request whether the Fund(s) should withhold federal income tax. Unless you elect in your redemption request that you do not want to have federal tax withheld, the redemption will be subject to withholding.

Low Balances: If at any time your account balance falls below \$2,500, the Fund may notify you that, unless the account is brought up to at least \$2,500 within 30 days of the notice, your account could be closed. After the notice period, the Fund may redeem all of your shares and close your account by sending you a check to the address of record. Your account will not be closed if the account balance drops below \$2,500 due to a decline in NAV. The Fund will not charge any redemption fee on involuntary redemptions.

FREQUENT PURCHASES AND REDEMPTIONS OF FUND SHARES

The Fund discourages and does not accommodate market timing. Frequent trading into and out of the Fund can harm all Fund shareholders by disrupting the Fund’s investment strategies, increasing Fund expenses, decreasing tax efficiency and diluting the value of shares held by long-term shareholders. The Fund is designed for long-term investors and is not intended for market timing or other disruptive trading activities. Accordingly, the Board of Trustees has approved policies that seek to curb these disruptive activities while recognizing that shareholders may have a legitimate need to adjust their Fund investments as their financial needs or circumstances change.

The Fund currently use several methods to reduce the risk of market timing. These methods include:

- Committing staff to review, on a continuing basis, recent trading activity in order to identify trading activity that may be contrary to the Fund’s Market Timing Trading Policy;
- Assessing a redemption fee on shares held less than 90 days;
- Rejecting or limiting specific purchase requests; and
- Rejecting purchase requests from certain investors.

Though these methods involve judgments that are inherently subjective and involve some selectivity in their application, the Fund seek to make judgments and applications that are consistent with the interests of Fund shareholders.

Based on the frequency of redemptions in your account, the Adviser or transfer agent may in its sole discretion determine that your trading activity is detrimental to the Fund as described in the Fund's Market Timing Trading Policy and elect to reject or limit the amount, number, frequency or method for requesting future purchases or redemptions into the Fund.

The Fund reserves the right to reject or restrict purchase requests for any reason, particularly when the shareholder's trading activity suggests that the shareholder may be engaged in market timing or other disruptive trading activities. Neither the Fund nor the Adviser will be liable for any losses resulting from rejected purchase orders. The Adviser may also bar an investor who has violated these policies (and the investor's financial advisor) from opening new accounts with the Fund.

Although the Fund attempts to limit disruptive trading activities, some investors use a variety of strategies to hide their identities and their trading practices. There can be no guarantee that the Fund will be able to identify or limit these activities. Omnibus account arrangements are common forms of holding shares of the Fund. While the Fund will encourage financial intermediaries to apply the Fund's Market Timing Trading Policy to their customers who invest indirectly in the Fund, the Fund is limited in its ability to monitor the trading activity or enforce the Fund's Market Timing Trading Policy with respect to customers of financial intermediaries. For example, should it occur, the Fund may not be able to detect market timing that may be facilitated by financial intermediaries or made difficult to identify in the omnibus accounts used by those intermediaries for aggregated purchases, exchanges and redemptions on behalf of all their customers. More specifically, unless the financial intermediaries have the ability to apply the Fund's Market Timing Trading Policy to their customers through such methods as implementing short-term trading limitations or restrictions and monitoring trading activity for what might be market timing, the Fund may not be able to determine whether trading by customers of financial intermediaries is contrary to the Fund's Market Timing Trading Policy. Brokers maintaining omnibus accounts with the Fund have agreed to provide shareholder transaction information to the extent known to the broker to the Fund upon request. If the Fund or its transfer agent or shareholder servicing agent suspects there is market timing activity in the account, the Fund will seek full cooperation from the service provider maintaining the account to identify the underlying participant. At the request of the Adviser, the service providers may take immediate action to stop any further short-term trading by such participants.

TAX STATUS, DIVIDENDS AND DISTRIBUTIONS

Any sale or exchange of the Fund's shares may generate tax liability (unless you are a tax-exempt investor or your investment is in a qualified retirement account). When you redeem your shares you may realize a taxable gain or loss. This is measured by the difference between the proceeds of the sale and the tax basis for the shares you sold. To aid in computing your tax basis, you generally should retain your account statements for the period that you hold shares in the Fund.

The Fund intends to distribute substantially all of its net investment income and net capital gains at least annually. Both types of distributions will be reinvested in shares of the Fund unless you elect to receive cash. Dividends from net investment income (including any excess of net short-term capital gain over net long-term capital loss) are taxable to investors as ordinary income, while distributions of net capital gain (the excess of net long-term capital gain over net short-term capital loss) are generally taxable as long-term capital gain, regardless of your holding period for the shares. Any dividends or capital gain distributions you receive from the Fund will normally be taxable to you when made, regardless of whether you reinvest dividends or capital gain distributions or receive them in cash. Certain dividends or distributions declared in October, November or December will be taxed to shareholders as if received in December if they are paid during the following January. Each year the Fund will inform you of the amount and type of your distributions. IRAs and other qualified retirement plans are exempt from federal income taxation until retirement proceeds are paid out to the participant.

Your redemptions, including exchanges, may result in a capital gain or loss for federal tax purposes. A capital gain or loss on your investment is the difference between the cost of your shares, including any sales charges, and the amount you receive when you sell them. The Fund must report to the IRS and furnish to shareholders the cost basis information for shares purchased and sold. The Fund has chosen average cost as its standing (default) tax lot identification method for all shareholders, which means this is the method the Fund will use to determine which specific shares are deemed to be sold when there are multiple purchases on different dates at differing NAVs, and the entire position is not sold at one time. Shareholders may, however, choose a method other than the Fund's standing method at the time of their purchase or upon sale of covered shares. Shareholders should consult their tax advisors to determine the best IRS-accepted cost basis method for their tax situation and to obtain more information about how cost basis reporting applies to them. Shareholders also should carefully review the cost basis information provided to them by the Fund and make any additional basis, holding period or other adjustments that are required when reporting these amounts on their federal income tax returns.

On the Application, you will be asked to certify that your social security number or taxpayer identification number is correct and that you are not subject to backup withholding for failing to report income to the IRS. If you are subject to backup withholding or you did not certify your taxpayer identification number, the IRS requires the Fund to withhold a percentage of any dividend, redemption or exchange proceeds. The Fund reserves the right to reject Application that does not include a certified social security or taxpayer identification number. If you do not have a social security number, you should indicate on the purchase form that your Application to obtain a number is pending. The Fund is required to withhold taxes if a number is not delivered to the Fund within seven days.

The Fund must report to the IRS and furnish to shareholders the cost basis information for shares purchased and sold. The Fund has chosen average cost as its standing (default) tax lot identification method for all shareholders, which means this is the method the Fund will use to determine which specific shares are deemed to be sold when there are multiple purchases on different dates at differing NAVs, and the entire position is not sold at one time. Shareholders may, however, choose a method other than the Fund's standing method at the time of their purchase or upon sale of covered shares. Shareholders should consult their tax advisors to determine the best IRS-accepted cost basis method for their tax situation and to obtain more information about how cost basis reporting applies to them. Shareholders also should carefully review the cost basis information provided to them by the Fund and make any additional basis, holding period or other adjustments that are required when reporting these amounts on their federal income tax returns.

This summary is not intended to be and should not be construed to be legal or tax advice. You should consult your own tax advisers to determine the tax consequences of owning the Fund's shares.

DISTRIBUTION OF SHARES

Distributor: Northern Lights Distributors, LLC, (the "Distributor") located at 4221 North 203rd Street, Suite 100, Elkhorn, Nebraska 68022, is the distributor for the shares of the Fund. The Distributor is a registered broker-dealer and member of the Financial Industry Regulatory Authority, Inc. ("FINRA"). Shares of the Fund are offered on a continuous basis.

Additional Compensation to Financial Intermediaries: The Distributor and its affiliates, and the Adviser and its affiliates may, at their own expense and out of their own assets including legitimate profits, provide cash payments to financial intermediaries who sell shares of the Fund. Financial intermediaries include brokers, financial planners, banks, insurance companies, retirement or 401(k) plan administrators and others. These payments are generally made to financial intermediaries that provide shareholder or administrative services, or marketing support. Marketing support may include access to sales meetings, sales representatives and financial intermediary management representatives, inclusion of the Fund on a sales list, including a preferred or select sales list, or other sales programs. These payments also may be made as an expense reimbursement in cases where the financial intermediary provides shareholder services to Fund shareholders.

Householding: To reduce expenses, the Fund mails only one copy of the prospectus and each annual and semi-annual report to those addresses shared by accounts that have elected to receive paper copies of these documents. If you wish to receive individual copies of these documents, please call the Fund at 1-844-655-9371 on days the Fund are open for business or contact your financial institution. The Fund will begin sending you individual copies thirty days after receiving your request.

FINANCIAL HIGHLIGHTS

The following table is intended to help you better understand the Fund's financial performance for the past 5 years. Certain information reflects financial results for a single Fund share. Total return represents the rate you would have earned (or lost) on an investment in the Fund, assuming reinvestment of all dividends and distributions. This information has been audited by Cohen & Company, Ltd., an independent registered public accounting firm, whose report, along with the Fund's financial statements, is included in the annual report, which is available upon request.

Per Share Data and Ratios for a Share of Beneficial Interest Outstanding Throughout each Year Presented

	Institutional Class				
	For the Year Ended May 31, 2023	For the Year Ended May 31, 2022	For the Year Ended May 31, 2021	For the Year Ended May 31, 2020	For the Year Ended May 31, 2019
Net asset value, beginning of year	\$ 9.44	\$ 9.22	\$ 9.58	\$ 10.47	\$ 11.19
Activity from investment operations:					
Net investment income (loss) ⁽¹⁾	0.03	(0.18)	(0.12)	0.04	0.03
Net realized and unrealized gain (loss) on investments	(0.05)	0.40	0.32	(0.51)	(0.17)
Total from investment operations	(0.02)	0.22	0.20	(0.47)	(0.14)
Redemption fees	—	0.00 ⁽²⁾	0.00 ⁽²⁾	0.00 ⁽²⁾	0.00 ⁽²⁾
Less distributions from:					
Net investment income	—	—	(0.06)	(0.02)	—
Net realized gains	—	—	(0.50)	(0.40)	(0.58)
Total distributions	—	—	(0.56)	(0.42)	(0.58)
Net asset value, end of year	\$ 9.42	\$ 9.44	\$ 9.22	\$ 9.58	\$ 10.47
Total return ⁽³⁾	(0.21)%	2.39%	2.16%	(4.95)%	(0.96)%
Net assets, end of year (000s)	\$ 14,300	\$ 15,060	\$ 19,728	\$ 35,001	\$ 51,199
Ratio of gross expenses to average net assets ^(4,5)	2.72%	2.32%	2.08%	1.67%	1.62%
Ratio of net expenses to average net assets ⁽⁵⁾	2.72%	2.32%	1.91%	1.55%	1.58%
Ratio of net investment income (loss) to average net assets ⁽⁶⁾	0.28%	(1.96)%	(1.25)%	0.41%	0.24%
Portfolio Turnover Rate	1361%	3065%	5180%	5582%	3908%

(1) Per share amounts calculated using the average shares method, which more appropriately represents the per share data for the year.

(2) Less than \$0.01 per share.

(3) Total returns shown exclude the effect of applicable sales charges and redemption fees and assumes reinvestment of all distributions.

(4) Represents the ratio of expenses to average net assets absent fee waivers and/or expense reimbursements by the Advisor.

(5) Does not include the expenses of other investment companies in which the Fund invests.

(6) Recognition of net investment income (loss) by the Fund is affected by the timing and declaration of dividends by the underlying investment companies in which the Fund invests.

PRIVACY NOTICE

NORTHERN LIGHTS FUND TRUST IV

Rev. April 2021

FACTS

WHAT DOES NORTHERN LIGHTS FUND TRUST IV DO WITH YOUR PERSONAL INFORMATION?

Why?

Financial companies choose how they share your personal information. Federal law gives consumers the right to limit some, but not all sharing. Federal law also requires us to tell you how we collect, share, and protect your personal information. Please read this notice carefully to understand what we do.

What?

The types of personal information we collect and share depends on the product or service that you have with us. This information can include:

- Social Security number and wire transfer instructions
- account transactions and transaction history
- investment experience and purchase history

When you are *no longer* our customer, we continue to share your information as described in this notice.

How?

All financial companies need to share customers' personal information to run their everyday business.

In the section below, we list the reasons financial companies can share their customers' personal information; the reasons Northern Lights Fund Trust IV chooses to share; and whether you can limit this sharing.

Reasons we can share your personal information:	Does Northern Lights Fund Trust IV share information?	Can you limit this sharing?
For our everyday business purposes - such as to process your transactions, maintain your account(s), respond to court orders and legal investigations, or report to credit bureaus.	YES	NO
For our marketing purposes - to offer our products and services to you.	NO	We don't share
For joint marketing with other financial companies.	NO	We don't share
For our affiliates' everyday business purposes - information about your transactions and records.	NO	We don't share
For our affiliates' everyday business purposes - information about your credit worthiness.	NO	We don't share
For nonaffiliates to market to you	NO	We don't share

QUESTIONS? Call 1-631-490-4300
